

Dear friends of "Jetřichovice",

The 45th annual international conference Modern Electrochemical Methods (MEM) will traditionally be held from May 25th to 29th, 2026, at the Bellevue Hotel in Jetřichovice near Děčín.

The event is organized with the professional cooperation of the J. Heyrovský Institute of Physical Chemistry of the Czech Academy of Sciences and the Czech Chemical Society. The conference is supported by Metrohm Czech Republic s.r.o. The aim of MEM is to present to the professional public both new and existing electrochemical methods using the latest techniques and materials. Do not hesitate to submit registration forms from your institutions. As every year, the conference is open to various forms of active participation – review presentations, original works, and company presentations.

Despite the high professional level, the conference maintains an informal atmosphere and provides ample space for discussions.

We look forward to seeing you.
